

Sublimation Temperature Tracker

Log your best heat, time, and pressure for each tumbler brand and setup. Print and keep near your press.

Quick Reference (General Starting Points)

Tumbler Type	Temp (°F)	Time (min)	Pressure	Notes
Stainless Steel	380–400	6–8	Medium	Rotate in convection oven for even heat
Plastic (sublimation-safe)	350–375	4–6	Medium	Lower temp to prevent warping
Coated/Poly-coated	375–400	5–7	Medium	Follow manufacturer specs first

Session Details

Date: _____ Operator: _____ Batch/Order #: _____
 Ink Brand: _____ Paper Brand: _____ Printer Model: _____
 Press/Oven: _____ Calibration Date: _____ Room Temp/Humidity: _____

Tumbler Test Log

[illegible]

Tip: Adjust in small steps, $\pm 5^{\circ}\text{F}$ or $\pm 30\text{s}$, and note exact changes that improved color or sharpness.
