

HALLOWEEN 20 OZ TUMBLER WRAPS

MEASURE / LAYOUT / PAPER TEST

01 Record the exact blank

20 oz is a capacity, not a guaranteed wrap size. Record the product before choosing a template.

SUPPLIER + EXACT SKU	STRAIGHT / TAPERED
<hr/>	<hr/>
BODY CIRCUMFERENCE (IN)	PRINTABLE HEIGHT (IN)
<hr/>	<hr/>

Supplier template: width _____ in height _____ in | seam allowance _____ in

02 Why two straight 20 oz templates differ

SUPPLIER / SPECIFIC BLANK	DESIGN WIDTH	DESIGN HEIGHT
MakerFlo - straight 20 oz	9.325 in	8.125 in
REAL BLANKS - straight 20 oz	9.375 in	8.439 in

REAL BLANKS says its template includes 1/8 in seam overlap and 1/4 in bottom allowance. These dimensions must not be swapped between products.

03 Plan the Halloween seam zone

Place names, ghost faces, moon details and text away from the meeting edges. Put repeating bats, dots or background texture near the seam.

- ☐ Artwork centered; no face, name or letter crosses seam
- ☐ Paper-only test at 100% print scale; top and bottom edges level
- ☐ Paper meets / overlaps only as the blank supplier recommends

PAPER-FIT CHECK / PRESS LOG / SEAM DIAGNOSIS

04 Check before any heat

- ☐ Exact blank and coating confirmed for sublimation
- ☐ Correct straight or tapered supplier template selected
- ☐ Artwork mirrored only where the transfer workflow requires it
- ☐ Paper-only fit checked around full circumference
- ☐ Seam secured with approved heat tape; no air gap or buckling
- ☐ Machine, time, temperature, rotation and wrap method verified

05 Record the actual press method

BLANK MAKER INSTRUCTIONS

Oven / press model

Blank supplier instructions URL

Recommended temp (F)

Recommended total time

Rotation / sleeve / tape

Protective handling / cooling

PRINT TEST RESULT

- ☐ Seam meets
 ☐ White gap
 ☐ Double/dark line
 ☐ Faded edge

What changed / what to fix next:

06 Diagnose before changing heat

White seam gap	Recheck actual circumference, scaling and edge contact.
Doubled / dark seam	Check design continuity, overlap and paper-on-paper gap.
Faded top / bottom	Check equipment contact, blank shape and supplier cycle.
Blurred ghost / pumpkin	Look for paper movement or loose tape on removal.

If supplier instructions are missing, stop before heating. Do not use a generic 20 oz setting.
