# Mug Wrap Fit & Print Calibration Worksheet

Use the exact blank you own. Record before printing production artwork.

## 1. Identify the blank & equipment

Mug supplier / SKU _____

Capacity (11 oz, 15 oz, other) _____

Mug press or oven model _____

Mug type / straight area _____

## 2. Record real physical measurements

Supplier listed imprint W x H _____

Measured straight printable height _____

Measured usable wrap width _____

Clearance from handle / each edge _____

## 3. Compare paper fit before pressing

- ☐ Printed PDF at 100% / Actual size
- ☐ 1 in square measured correctly
- ☐ Paper fits within straight mug area
- ☐ Handle clearance confirmed
- ☐ Production file contains no guides

## Print-scale verification

Measure 1.00 x 1.00 in

US Letter landscape

Fit-to-page: OFF

## Design details

Design canvas W x H: _____

Software / export dimensions: _____

Mirrored for transfer? _____

Transfer paper / printer: _____

Supplier-recommended pressing method: _____

### Paper-fit observations / revision notes

_____

_____

_____

_____

_____

Important: supplier size and mug capacity do not guarantee the same press coverage. Use this worksheet for geometry checks only.

Follow the exact blank and equipment instructions. No universal time, temperature, pressure, or clearance is claimed.
