Sublimation Shrink Sleeve: Size & SKU Record

Print this before ordering sleeve inventory. The chart below is from JPPlus product documentation, not a universal fit guarantee. Match the exact blank and sleeve manufacturer.

1 | Supplier sleeve reference

Sleeve SKU	Supplier-listed sleeve dimensions
WRAP80	3.1 x 3.5 in
WRAP105	4.1 x 6.5 in
WRAP125	4.9 x 9.8 in
WRAP150	5.9 x 9.8 in
WRAP175	6.89 x 9.84 in
WRAP195	7.68 x 5.91 in
WRAP900	11.81 x 5.91 in

2 | Example blank-to-sleeve matches

Supplier item (illustrative SKU matches)	Listed sleeves
XP8156R / 11 oz white Rhinocoat mug	WRAP175 or WRAP195
DW250SS / DW251SS / 20 oz stainless tumbler	WRAP125 or WRAP150
DW30ST-W / 30 oz straight tumbler	WRAP900
DW40SH-W / 40 oz handled tumbler	WRAP175

Use the listed dimensions only to identify the supplier sleeve SKU. The mug/tumbler circumference, sleeve shrink behavior and heating limits must be checked separately.

Reference: JPPlus Shrink Sleeve Sizing Chart, product/SKU rows. Confirm the latest chart and product-specific instructions before use.

Sample Sleeve Fit & Press Record

Use one form per blank SKU, sleeve SKU and transfer setup. Record observed results; do not use this form to invent performance evidence.

3 | Blank and sleeve identification

Blank supplier / date received	_____
Blank item number / lot	_____
Max outside diameter / overall height	_____
Artwork coverage and print dimensions	_____
Sleeve manufacturer / SKU / dimensions	_____
Compatibility source checked (link/manual)	_____
Approved oven / accessory / safety directions	_____

4 | Controlled sample result

Manufacturer time/temp/handling guidance	_____
Transfer, ink, paper and blank SKU	_____
Actual process used / test date	_____
Seam / edges / top / bottom result	_____
Color / physical damage / notes	_____
Photo or sample reference	_____
Decision	[ ] APPROVE [ ] HOLD [ ] REJECT [ ] RETEST

STOP if sleeve heating limits, plastic parts, item coatings or cooling instructions are unclear. Never infer one manufacturer's oven settings from another.
